BOOK SYNOPSIS

This volume argues that communication is at the heart of all approaches to dementia care, and is an in-depth exploration of ways of establishing and developing communication with people with dementia. It examines both the nature of dementia as a condition and the subjective experience of those affected. The authors consider in detail how communication between people with dementia and those who care for them changes, and how it can be maintained and enhanced. They include a significant amount of material quoted from people with dementia, and suggest ways of interpreting their words and actions. We learn about what it might be like to have dementia, and what sort of help is needed by people in this situation. Throughout the book the authors address the ethical issues and the implications for practice.
